Education

University of Victoria

Victoria, BC, Canada

Bachelor of Science in Computer Science (Software Systems), Minor in Business

Dec 2025

Graduating GPA: 3.8/4

- **Relevant Coursework:** Software Engineering, Web Development, Databases, Algorithms and Data Structures, Operating Systems, Software Testing and QA

Professional Experience

Infinity Outdoor Pvt. Ltd

Delivered 2025

Contract Web Developer

- Sole developer — **architected and shipped** a full production marketing site in React, Vite, and Tailwind CSS from zero.
- **Cut page load time by 35%** via lazy loading, optimized asset pipeline, and lean component architecture.
- Translated stakeholder requirements directly into **reusable, scalable UI components** with zero design handoff friction.

Houle Electric

Jan 2024 – Aug 2024

Co-op Project Manager / Assistant

Cowichan District Hospital Redevelopment

- Built **Procore and Excel tooling** to automate large-scale project data validation, **cutting manual workflows by ~30%**.
- Designed **QA/QC inspection systems** adopted across **5+ teams**, enforcing consistent data standards and reducing defects reaching production.
- Partnered with engineers and team leads to map real-world processes into **automated Procore workflows**, eliminating redundant manual data entry.

Technical Projects

SwiftTrade - Day Trading System

Python, REST APIs, Docker, JMeter, MongoDB, RabbitMQ, Redis

- Engineered a **full-stack trading platform** with live order management, wallet system, and role-based authentication.
- Built a custom **FIFO order-matching engine** handling partial fills and sorted order books with sub-millisecond logic.
- **Load-tested with JMeter** across concurrent user scenarios, validating system stability and API reliability under stress.

Social Spark — AI Brand & Influencer Platform

React, Node.js, MongoDB, Gemini API, Docker

- Delivered a **production-grade full-stack platform** pairing brands with influencers via AI-driven campaign analysis.
- Automated content scoring and recommendation generation by integrating **Gemini API**, reducing manual evaluation effort.
- Designed **JWT-secured APIs** and modular backend services built to scale across user growth and new feature rollouts.

Production Portfolio Website

Next.js, Analytics, SEO

- Shipped a **fully optimized, SEO-tuned** production site with responsive design and fast load across all devices.
- Instrumented **GA4 and Microsoft Clarity** to track engagement, scroll depth, and resume downloads with custom events.

RhythmBeats

Arduino, Teachable Machine, Sensors

- Built a **real-time physical music system** using Arduino sensors and a trained Teachable Machine classifier for block detection.
- Achieved **reliable low-latency note mapping** from physical inputs to audio output in a live interactive environment.

SceneCraft

Arduino, AI, Physical Interaction

- Created a **tangible AI storytelling device** that maps physical object sequences to dynamic Gemini-generated narratives.
- Designed the full **hardware-to-AI pipeline** — from sensor input to prompt construction to real-time story output.

Technical Skills

Programming Languages: Python, TypeScript, Java, JavaScript, C++

Web & Frontend Development: React, Next.js, HTML, CSS, Tailwind CSS

Backend & APIs: Node.js, Express, REST APIs, Microservices, JWT

Databases & Data Management: MongoDB, PostgreSQL, SQL

Development Practices: Full-Stack Development, Agile, Scrum, CI/CD, Docker, SDLC

AI & ML Tools: Gemini API, Teachable Machine, AI-assisted Development, Machine Learning

Additional

Interests: Building scalable systems, learning new technologies, system design, video games
